Hayward, CA June 1, 2016

Ampex Data Systems, a Delta Information Systems Company, has announced their receipt of a contract from Naval Air Warfare Center Training Systems Division for \$4.124M. Ampex will supply their TuffServ 282 (TS282) NFS Mission Servers and supporting storage media that are used for the U.S. Navy's E-2D Aircraft. The procured systems will support E-2D training devices and options for the E-2D fleet .

"This contract is a on-going key part of the Ampex Data Systems strategy for a family of airborne mission data recorders," stated Jim Orahod, General Manager.

ABOUT AMPEX DATA SYSTEMS Ampex Data Systems Corporation, a wholly owned subsidiary of Delta Information Systems, Inc. and headquartered in Hayward, California, is a world leader in design, development and manufacture of airborne recording systems and storage solutions for rugged application. To learn more about Ampex, and the complete line of miniR™, TuffServ™, and other products for use with IRIG 106 Chapter 10 systems, NAS and SAN network appliances and solutions, and high-definition video offerings visit www.ampex.com.
