Ampex Data Systems, a Delta Information Systems Company, has announced their receipt of a contract from Lockheed Martin Mission Systems and Training (MST), Owego, NY to provide the Ampex TuffServ 640 (TS640) Airborne NAS 10GigE Server/Recorders to be utilized in Lockheed's new advanced Mission System. The first systems will be utilized under a FMS Contract for the P-3 aircraft platform. Under this contract Ampex will provide the TS640 File Servers and Support. The TS640 is a state-of-the art, high-data rate, multi-terabyte storage and compute platform.

This contract is a key part of the Ampex Data Systems strategy for airborne mission data recorders stated Jim Orahood, General Manager. We look forward to supporting Lockheed Martin MST in this program area.

ABOUT AMPEX DATA SYSTEMS

Ampex Data Systems Corporation, a wholly owned subsidiary of Delta Information Systems, Inc. and headquartered in Redwood City, Calif., is a world leader in design, development and manufacture of airborne recording systems and storage solutions for rugged application.
